ZHEJIANG GOLDEN EAGLE GROUP CO., LTD

SOFTENER MACHINE

Type : S 24

Main Feature :

The emulsion plant is used in order to lubricate and soften the bark and gummy raw jute. The emulsion plant consists of gear pump, motor, vat, jet sprayer, nozzles, valves, emulsion tank and the jacket. The softner machine is robustly built, having many pairs of spirally fluted rollers. The rollers are driven by gear, spocket, chain, bearing, bush etc. The jute is thus rendered suitable for carding. 24 pairs, roller .

Technical Specification

Motor	10 kw
Quantity of Roller	24 pair
Production	800 kg/hour
